PROFESSIONAL EXPERIENCE

September 2019 – Present
 Sanlam Private Wealth
SQL/BI Developer

Duties and Responsibilities

My role includes developing SSIS packages, SQL Jobs and scheduling/process automation. I also support and enhance existing processes, provide second line and third line support on rotational standby.

PROFESSIONAL EXPERIENCE

March 2019 – June 2019
 Venn Cubed
IBM Planning Analytics/ Cognos Developer And SQL Developer

Duties and Responsibilities

Venn Cubed is a consulting firm which specializes in building budgeting, reporting and predictive models. My role entails designing multidimensional data models, developing them and the data cubes, writing the business rules and testing.

I also develop reports using IBM Planning Analytics/Tm1, test and deploying them to be accessed using a web browser using tm1 web. My duties also include developing ETL processes utilizing IBM Turbointegrator to extract data from various sources such as flat files, cubes and relational databases and load it to the production cubes.

PROFESSIONAL EXPERIENCE

September 2017 - February 2019
 Riscura Holdings
SQL Developer

Duties and Responsibilities

RisCura Holdings is an investment advisory firm, I worked for the company as a SQL Developer. My role included taking part in daily stand up meetings, sprint planning and grooming sessions.

I main responsibilities were to write SQL stored procedures to extract data from our databases, perform calculations according to our clients requirements. Build SSRS reports, test and deploy them so that our clients can have access to them, we also provided support for the reports and tools that we built.

PROFESSIONAL EXPERIENCE

March 2017 - September 2017
Switch2 Cover
Reporting Analyst / Developer

Duties and Responsibilities

My role at Switch2 Cover is an insurance company specializing in Credit life insurance. My duties included working with various data providers. I would receive data files from our providers, extract relevant data, transform it so that it's in line with the way database tables are designed and load the data.

Once the data is loaded then our sales agents would start contacting potential, after each business day I would develop analytical reports using SSRS and excel so that management can have a look at how the business is performing.

TECHNICAL PROFICIENCY

- Microsoft Office (Excel Functions / Pivot Tables) | Atlassian JIRA | Sub-Version.
- SSRS | SSIS | Data Analysis | Multidimensional Modelling | PowerBI | IBM Cognos.
- Databases (SQL / T-SQL / Stored Procedures / Functions / MySQL / MS SQL Server / MS Access).
- Visual Studio | NetBeans
- VICIdial | Programming (Java / PHP / HTML / CSS).
- IBM Planning Analytics | Computer networks | ArcGIS | IDRISI TAIGA .
- Computer hardware | Windows Operating Systems.
